ABOUT US

PMW Egypt is a multidisciplinary engineering consultancy with over 30 years of experience in delivering safe, reliable, and efficient solutions for energy and infrastructure projects. With a portfolio of more than 500 successfully delivered projects, we are recognized for our expertise in complex and safety-critical facilities .Our team of experienced engineers is committed to excellence, sustainability, and innovation—partnering with clients to deliver engineering solutions that stand the test of time.

Our Vision

To be a recognized benchmark in engineering consultancy, delivering high-quality solutions that place safety, integrity, and sustainability at the core of every project—creating long-term value for our clients and partners across the energy and infrastructure sectors.

Our Mission

To act as a trusted engineering partner by delivering innovative and sustainable solutions that support the development of critical infrastructure. We are committed to building long-term client relationships through technical excellence, international best practices, and exceptional project delivery.

Company Milestone

1994

Foundation & Early Excellence

PMW was established with a strong focus on delivering turnkey engineering solutions for industrial and pharmaceutical sectors, laying the foundation for a reputation built on quality, reliability, and trust..

2002

Market Leadership in Egypt

PMW emerged as a key player in the Egyptian market, leading complex downstream oil & gas projects and strengthening its position as a trusted engineering consultancy...

2022

Regional Expansion

PMW successfully expanded into the Saudi market, delivering aviation fuel tank farm projects at Jazan and Riyadh Airports, marking a significant milestone in regional growth.

2030

Vision for the Future

PMW aims to lead the engineering consultancy landscape across the MENA region by delivering innovative, safety-driven, and sustainable engineering solutions for next-generation infrastructure.

2025

Portfolio-Scale Consultancy

PMW conducted a comprehensive portfolio assessment for 74 service stations in collaboration with TotalEnergies – Aramco in KSA, reinforcing its expertise in large scale, multi-site engineering programs...

Decades of Impact Hundreds of Successes

+30 Years of Experience

Decades of hands-on expertise in delivering complex and safety-critical engineering solutions.

+50 Qualified Professionals

A multidisciplinary team of experienced engineers and specialists committed to excellence and innovation

+500 Completed Projects

Successfully delivered projects across energy, oil & gas, aviation, and infrastructure sectors.

22 Excellence Awards

Industry recognition reflecting our commitment to quality, safety, and outstanding project delivery

Our Services

1.

Engineering Design

We deliver integrated engineering design solutions covering architectural, structural, and MEP disciplines. From BED and FEED to detailed design, our approach ensures functional efficiency, environmental responsibility, and compliance with international standards—transforming concepts into fully engineered, build-ready solutions.

3.

Construction Management & Supervision

PMW offers comprehensive construction management and site supervision services, leveraging decades of experience to control quality, schedule, and cost. Our team ensures seamless coordination among all stakeholders, accurate documentation, and successful delivery of projects up to turnkey completion.

3.

Maintenance & Asset Support

We support the long-term performance of client assets through maintenance oversight and contract compliance. Our services ensure safe operations, adherence to approved procedures, and optimized lifecycle performance.

4.

Health, Safety & Compliance

Safety is embedded in every stage of our work. We provide continuous supervision and HSE oversight to ensure full compliance with international codes, regulations, and best practices—minimizing risk and safeguarding people, assets, and operations.

5.

IT & Digital Infrastructure

PMW provides IT and digital infrastructure services, including network design, system configuration, and implementation. We deliver secure, scalable solutions covering routers, switches, firewalls, VPNs, and system upgrades to support reliable and efficient operations.

Portfolio Assessment Services

Site Inspection & Data Collection

Conducting on-site inspections to assess the current condition of each facility, document existing systems, and identify physical, operational, and safety constraints.

Multidisciplinary Technical Review

Evaluating architectural, structural, electrical, mechanical, fuel systems, and safety aspects to ensure technical integrity and operational readiness.

Design Review & Optimization

Reviewing existing layouts and systems to assess efficiency, circulation, and suitability for upgrades or renovation.

Safety & Compliance Assessment

Reviewing facilities against applicable international codes, standards, and local regulations to identify non-compliance issues and safety risks..

Risk Identification & Gap Analysis

Identifying technical gaps, deficiencies, and potential risks that may impact operations, safety, or future renovation works.

Recommendations & Improvement Roadmap

Providing clear, actionable engineering recommendations and a prioritized roadmap to enhance safety, compliance, and overall asset performance.
